Honorable & Mentionable . . .

An inmate of the federal penitentiary at Marion, Victor Laurence Taylor, has completed his studies for a bachelor's degree at Southern Illinois University in an amazing 21-month period with near-perfect grades.

Taylor, 28 years old and black, majored in psychology with a minor in Black American Studies. The time required to finish his work compares with four academic years for normal completion.

Taylor was not present when diplomas were handed out at the SIU Summer Commencement held Sept. 1, as regulations prohibited him from leaving the maximum security institution where his work was done. Instead, there was a special graduation ceremony in late September at the prison, where he graduated with honors.

Taylor was admitted as a graduate student in psychology this fall at SIU. Walter G. Robinson, Jr., director of the SIU Black American Studies program, said that Taylor did work at John A. Logan College at Carterville as well as at SIU and took as many as 42 hours in one quarter. His grade average is 4.89.

University House: The President's Home

The University House, begun in 1969, became occupied this September by SIU at Carbondale President David Derge, his wife and daughter.

Dedication of the house, which is officially called the University House and Guest Facilities, took place the weekend of Oct. 20-21.

Delyte W. Morris was president of SIU when controversy flared over construction costs of the executive residence. Work was stopped, then resumed after Chicago philanthropist W. Clement Stone gave the SIU Foundation a \$1 million stock gift to finish it.

The University sold its share of the home and the 7.3 acre site to the SIU Foundation for \$550,000 and is now leasing it for the president's use. The proceeds have been put into a President's Academic Excellence fund to develop new educational programs on the campus.

The opening of the University House had been held up several months by furniture and decorating delays. Since it was opened, however, hundreds of guests have toured the facilities. In late October, Alumnus photographed Dr. and Mrs. Derge and their new residence especially for Association members.

Surrounded by twelve acres of rolling lawn which borders the Lake on the Campus woods, the University House at Southern Illinois University at Carbondale blends its function as the president's home and University guest facility.

The planning and construction of the University House began under the presidency of Delyte W. Morris, and was completed in 1971.

It is constructed as a low maintenance, permanent campus building, with a Tennessee Crab Orchard stone exterior, copper fascia, bronze anodized aluminum window frames and steel girders. Its gross square footage is 15,000 square feet. The wrought iron gates at the entrance to the grounds originally stood in front of Old Main, built in 1887 and destroyed by fire in 1969.

A large dining room on the right of the foyer accommodates eighty to one-hundred for buffet dining and seats twenty. At the left of the entrance, past a small elevator to the second floor, is the spacious, formal entertaining area with a striking utilization of glass walls. Sliding glass doors play a principal role in the decor of the house throughout. In pleasant weather, several hundred guests can be entertained using indoor and outdoor facilities. Allowing guests to flow through the various areas, larger groups can be served and still feel part of the gathering.

Further down the corridor is a large, paneled conference room with a large fireplace, one of four in the house. Adjoining the conference room is a kitchenette and a short hall which takes the visitor to the family side of the house.

The family living room opens onto the atrium fountain and small garden which nestles in the center of the house. The atrium is bordered by the glass walls of the two main corridors, the living room and the family dining area which will seat eight to ten.

The main floor also houses a large, utilitarian kitchen, the master bedroom, a recreation room with sliding glass doors onto a patio, a small house staff apartment, a three car garage, a large patio in the rear and storage areas.

One of the two staircases to the second floor takes the visitor either to the family or to the guest section of the house. The second floor is designed to allow maximum flexibility with five large bedrooms and a sitting room with fireplace. Rich woods of walnut, birch, teak, oak, ash and cherry add warmth throughout the house.

The University House and Guest Facilities at SIU at Carbondale was made possible through a gift by W. Clement and Jessie V. Stone. The Stones gave the SIU Foundation \$1 million in stock to pay for the residence.

On hand for dedication ceremonies of SIU's School of Dental Medicine Oct. 3 in Alton were, from left, Randall Bell, dental student from Belleville, SIU trustee Harris Rowe, trustee chairman Harold Fischer, Dr. John Rendleman, SIU at Edwardsville president, Mrs. Richard Ogilvie (wife of the governor) and Dr. Frank Sobkowski, dean of the SIU dental school.

"To see a student body here is the long-awaited realization of a dream we had more than five years ago," Dr. William Greek, executive secretary of the Illinois State Dental Society, said at the opening of the Southern Illinois University School of Dental Medicine.

The first class of 24 students, all from Illinois, gathered on the University's Alton campus near the first of September for four days of orientation. Course work began Sept. 11.

Greek said justifying a dental school in Southern Illinois to the necessary state agencies "was not at all difficult, because the need was so apparent."

Illinois has three other dental schools, but all are in Cook County. They graduate a total of 250 dentists per year, but the majority leaves the state to set up practice, and many others stay in the Chicago area. Few come to southern Illinois.

Dr. Frank Sobkowski, dean of the SIU dental school, said for years more than half the dentists in downstate Illinois were supplied by the dental schools at St. Louis University and Washington University, both in Missouri. But by 1971 Washington University had only two Illinois students in its first-year dental class, and St. Louis University had closed its dental school altogether.

"The urgency of establishing a dental school, mentioned in the man-

date of the state Board of Higher Education, was heightened by the closing of St. Louis University's school," said Sobkowski, who arrived at SIU in the summer of 1969 after being selected in a nationwide search for a dean by the SIU Board of Trustees.

Sobkowski said Illinois is fifth in the U.S. in population and fourth in per capita income, but 14th in dentist-patient ratios.

"To aggravate the situation, distribution is poor, with 70 per cent of the state's dentists in the six-county Chicago area," Sobkowski said. "The ratio of dentists to patients around Chicago is about 1 to 1,500, but in Madison and St. Clair counties, the ratio is about 1 to 3,000.

"The keynote of everything we did was to establish a dental school here as soon as possible while still developing a program of excellence," he said.

Though the normal time for start-up is seven years, it took Sobkowski and his faculty only three years to meet the requirements of the American Dental Association to accept students.

The students attend under a three-year curriculum, with no summer break, rather than the traditional four years.

"The curriculum will be flexible, with students allowed to work at their own pace," said Dr. James

SIU's Dream of Dental, Medical Schools Becomes Reality

Harrison, associate dean for education. "Some may graduate sooner than three years; others can take longer and there will be no stigma."

Sobkowski said in addition to allowing some students to graduate earlier and establish practices in areas of urgent need, the curriculum has other advantages.

"We think it's desirable to have a professional curriculum operating on a continuous basis," Sobkowski said. "That way skills that are learned don't have to be relearned. And of course a three-year program is most economical for everyone, especially the students and the taxpayers of the state."

Sobkowski said "though there is no question that our prime mission is education, the dental school will be more than a school—we are planning it as an oral health center."

The school will be concerned with patient care for some community residents and will continue to provide an advanced education program for practicing dentists, under the direction of Dr. Richard Coy.

When the University first decided to open the dental school on the Alton campus, there were plans to build a permanent facility able to handle much larger classes on the Edwardsville campus by 1975.

Building plans for the Edwardsville campus have been shelved temporarily because of funding shortages, but Sobkowski said he hopes a permanent facility can be erected someday.

"We'll outgrow the Alton campus in three to five years unless we drop plans for important programs like training of dental auxiliaries and establishing graduate degrees," he said. "The SIU Board of Trustees has set aside 80 acres for us in Edwardsville. We have the ground, to build on, but we must get the money." □

The development of the Southern Illinois University School of Medicine has been a long and arduous one. But it stands today poised on the brink of something exciting, something refreshing and something revolutionary in the field of medical education.

It is a quite rare breed of medical school in that it proposes to do most of its work in teaching in hospital buildings that already are built. In the main, those will be the existing facilities on the campus of SIU at Carbondale, a School of Medicine Educational Facility at Springfield and two hospitals in Springfield, St. John's and Memorial.

Dr. Richard Moy, dean of the School of Medicine, said the cost of building SIU's program to the point where it is graduating 100 new physicians a year will total \$20 million, compared to \$100 million for conventional campus medical schools with their expensive teaching and research hospitals.

"The five Chicago schools hadn't nurtured downstate health care and those existing centers merely acted as a magnet to hold doctors there," Moy said. "The Illinois Health Care Commission, recognizing the urgent need for more physicians and health care progress downstate, made a critical decision in deciding to go full speed with full financing by the state," Moy declared. "If we had waited for one federal dollar, it would be 1975 or 1976 before we could have begun, instead of 1972."

Current plans are to involve an increasing number of citizens in central and southern Illinois to assist the School of Medicine in its planning. Defined goals are for 90 per cent of the people and 50 per cent of the communities in central and southern Illinois to have access to effective medical care and to comprehensive health care delivery systems. By 1978

the School of Medicine will support development of these programs.

Practicing physicians will teach aspiring doctors in their offices and clinics and in the wards and hallways of area hospitals. Continuing education programs for area doctors are being developed, as well as programs for training in the allied health professions in consortium with area educational institutions. Personal health education programs for area citizens will be developed. Graduates will serve their residencies in the communities large and small, and family practice will be encouraged.

The three-year program leading to the M.D. degree calls for students to take their first year of courses in the basic sciences on the Carbondale campus and the second and third years of clinical study in Springfield. Memorial and St. John's Hospitals in the capital city, in association with the School of Medicine, offer excellent facilities to meet the clinical needs of the students.

While the SIU School of Medicine is a newcomer to health education in the state, SIU's pre-medical

program is not. The University has been turning out pre-med candidates for other medical schools for years and years. The pre-med student advisor says SIU's crop, year by year, is among the best anywhere.

"The stuff we teach just happens to be darn good for medicine," declares Alfred Richardson, longtime bio-medical researcher and professor.

What he means is that SIU students have to undergo a broad "general studies" backgrounding as well as a hard-core science curriculum, including chemistry, physics, mathematics and biology.

Beginning in June, 1973, with the initial first-year class of 48 students in Carbondale and 24 advanced standing students in Springfield, instruction will be provided not only in the sciences, but also in the social sciences. This, hopefully, will produce a graduate who is not only well-trained in dealing with life in its many forms, but one who will also know how to live. That is the commitment of the Southern Illinois University School of Medicine as a goal and as a philosophy. □

A talk by Illinois Governor Richard Ogilvie followed groundbreaking ceremonies Dec. 18 at Springfield for the SIU School of Medicine. Shown here are, from left, Governor Ogilvie; Dr. William Stoneman, program coordinator of the Bi-State Regional Medical Program, with headquarters in St. Louis; Dr. Richard Moy, dean of the SIU medical school; and Robert Layer, then president of SIU at Carbondale.

Foundation Royalties

More than \$100,000 in royalties has been received by the Southern Illinois University Foundation from the first faculty invention assigned to it—a disposable plastic laboratory mouse cage, first manufactured and marketed in 1960.

The small animal cage, invented by microbiology professor Isaac Shechmeister and Harold Cohen M.A. '59 and Robert Hunter '56, then members of the design department, is still the Foundation's No. 1 royalty producer, although 21 other

News of the Campus

faculty inventions or publishing projects are producing income, according to Kenneth R. Miller, Foundation executive director.

Since 1959, when the Foundation first began its service of patenting and marketing inventions and projects assigned to it, 219 projects have been submitted for consideration and 63 accepted as potential money-makers. Eight of these are publishing enterprises, three are musical recording projects, one is a series of films and the remainder are scientific inventions and processes.

Of the 21 revenue-producing projects, two are from the faculty of SIU at Edwardsville, 19 from SIU-Carbondale, Miller said.

"The value of projects coming to us has tripled in the last three years," Miller said. "As a result, we have had to establish a screening committee to make a preliminary evaluation before referring a project to our Foundation Board's Research and Projects Committee.

"The B and P Committee feels that hereafter we must be more highly selective about the types of projects, and that we should not ac-

Dina Yellen stands by the 27-foot mural which won her an \$8,000 prize in a campus-wide student art competition at SIU at Carbondale. She installed her mural in the Student Center during the summer before receiving her Master of Fine Arts degree at SIU and leaving for Plainfield, Vt., and a life as a full-time artist.

cept projects in the toy and game field except in extremely unusual circumstances."

Although most of the projects come from the faculty, a number of area citizens also have submitted inventions, Miller said, and these are still welcome.

When the Foundation accepts an invention or project, it assumes the responsibility of obtaining a patent or copyright and of contracting for commercial manufacture or publication and distribution. Proceeds from royalties are shared 50-50 between the inventor and the Foundation. The Foundation's share is then ploughed back into other University research projects.

Sound Pollution

There's a lot of commotion today about pollution of the air we breathe, but Roderick Gordon—and scores of his acoustics students—are disturbed about the pollution of the air we hear!

Gordon, professor of music at SIU at Carbondale, is a physicist as well as a music educator, and has specialized in acoustics, the science of

sound.

"Sound pollution is a newly recognized hazard, and one about which we have very little information at present," Gordon said. "Yet audiometric tests of new college students have been published indicating that the incidence of high frequency hearing loss is on the increase."

Prolonged loud noise has been proven to damage the nervous system, producing neuroses, he asserted. Even the unborn child suffers from the impact of excessively loud sounds, he added.

Some of the major culprits in pollution of our sound environment are jet planes, unmuffled exhaust systems in cars, airplanes, tractors, motor cycles, lawn mowers, pneumatic hammers, factory whistles and elevated trains, all of which produce sounds (or noise) at a dangerously high level. So do "rock" bands, either in person or on tuned-up television, hi-fi or radio!

"A great many of the incoming college freshmen with hearing loss have turned out to be high school 'rock' band performers," he said.

"Unfortunately, there is no known

cure for noise-induced hearing loss. Once you have lost your hearing, you have lost it for the rest of your life."

Yet Gordon himself may have inadvertently contributed to the birth of "Public Enemy No. 1" in the sound pollution racket—the electric guitar!

In 1946, when he was teaching a course on acoustics of music at the National Music Camp at Interlochen, Michigan, he plugged a "broomstick" violin into the powerful Interlochen Bowl PA system as an experiment. "My wife, shopping in the town a mile away, later reported she heard the performance loud and clear," he said.

"The camp president, intrigued with the possibilities, asked me to hook up one instrument in the bass viol section for a rehearsal of the National Orchestra. I did, and adjusted the volume in mid-scale. The electrified one completely drowned out the 250-piece symphony orchestra!"

Some of the major symphony orchestras tried out the system and it worked very well, he explained. The audiences were unaware of the innovation. Other instruments such as the amplified clarinet and saxophone were put on microphone, with varied success.

"Then the electric guitar came on the market, and has become the kingpin of the rock and country music bands," he added, a bit ruefully.

When Gordon started his first class in "acoustics of music" at SIU, it was designed primarily to provide music students with an understanding of musical sounds—their production, transmission and reception.

But when it became a course in the University's General Studies program, it drew students from "across the board." He requires each student to write a term paper, on any subject he pleases, just so it has something to do with acoustics.

He was amazed at the applications

the students made—in zoology (birds, bees, bats), in recreation ("The Scientific Study of the Sounds of a Pub," "Flute Characteristics of a Volkswagen with Sun Roof"), in psychology ("Psychoacoustics"), in education ("The Deaf Child: His Potential"), in crime ("The Thousand Ears of Voiceprint"), in business, ("Controlling Sound in Offices"), in design and architecture ("Absorption Coefficients for Some Common Building Materials" and "Sound-Proofing the Home").

As today's youth has become increasingly involved with the environment, noise pollution has become an increasingly popular topic for the term papers, witness "The Third Pollutant—Noise," "Toxic Emotional and Physical Effects of Everyday Noise" and "How Loud Is Loud?"

Gordon answers the question raised in the last-named paper thus:

The "geiger counter" for noise pollution is the oscilloscope, which measures sound in decibels. Normal conversation runs to about 40 decibels, a symphony orchestra 90, a power mower or a motor cycle 200, a turbojet 140, a 'rock' band at least 140.

Prolonged assault on the hearing mechanism of anything above 85 decibels will cause hearing damage, he said, and the 140-decibel blast of the turbojet is well above the pain threshold.

Gordon advocates earplugs or wads of cotton for people whose jobs require them to be near high intensity sound for prolonged periods.

"The 'rock' musician should stand back of his amplifier-speaker and wear earplugs," he said. "The audience gets the brunt of the damaging sound, but for shorter periods of time, so probably little if any damage will result."

Gordon, who has written extensively in the field of music education, has served for many years on the editorial board of the *Journal of Re-*

search in Music Education and as a member (and chairman for two years) of the Music Educators National Conference research council.

Because existing textbooks do not cover the broad application of acoustics to such fields as architecture, construction, sound pollution and other newly recognized fields, Gordon has written his own text for his class and is preparing it for publication.

Opera Head to Retire

Marjorie Lawrence, professor of music at SIU at Carbondale, has announced her plans to retire at the end of the 1973 summer session.

Miss Lawrence, former Metropolitan and Paris opera star, has been director of opera productions at SIU since 1959. Last year both the opera workshop and the production company were renamed in her honor.

Robert House, School of Music director, said that the 1972-73 opera season is dedicated to Miss Lawrence, and a scholarship fund will be started in her name. The new opera season includes the Midwest premiere of the Black opera "Treemonisha," Nov. 17-18; Opera Showcase, Nov. 30; a showing of "Interrupted Melody," MGM motion picture based on Miss Lawrence's autobiography of the same name, Jan. 5; the opera "Don Giovanni" March 2 and 3; and Spotlight on Opera in May.

During her 13 years at SIU, Miss Lawrence has trained hundreds of students in opera and has sent a dozen of them to operatic careers in Europe, the Metropolitan Opera Company and other U.S. opera companies. At least another dozen are teaching and have started their own opera workshop in schools and colleges.

Widely recognized as one of the world's great Wagnerian dramatic sopranos during the 1930's and until she was stricken with polio in 1941, Miss Lawrence persevered in treat-

ment and rehabilitation until she was able to sing professionally again—in radio, concert tours, recordings and with the Metropolitan Opera Company from a seated position.

During World War II and immediately afterward, she toured the Southwest Pacific and occupied territories singing to U.S. and allied service men.

Honors have continued to come to her through the years—the Legion of Honor from the French government, invitations to the White House, honor guest salutes by the Met, an honorary Doctor of Humane Letters degree from Ohio University and citation as a Fellow to the Royal Arts Society of Great Britain.

In addition, she is listed in a dozen “who’s who” publications, in the U.S., Germany, and Australia, including several international biographical ones.

Her autobiography was re-issued in 1969 in a new edition published by the SIU Press.

Smoking Research

With American sale of cigarettes on the increase despite a ban on television advertising, the question of why persons continue smoking despite evidence it is harmful to health is an intriguing one.

Kenneth Kleinman, psychology professor at SIU at Edwardsville, says many of the traditional theories of why persons smoke do not hold up under scrutiny.

Kleinman is doing research to test his three-step hypothesis that chronic smokers (a) are unable to effectively regulate their level of arousal; (b) use nicotine as an external aid to correct that inability; (c) have their smoking behavior reinforced when their performance of everyday tasks improves.

“Such a rigidity in the habits of chronic smokers indicates profound adaptive values for those persons,” Kleinman said. “If smoking is per-

sistent it may be beneficial behaviorally for certain smokers.”

The theory that chronic smoking is attributable to nicotine addiction is questioned by Kleinman.

“Not every person who begins smoking in adolescence becomes a confirmed chronic smoker in his adult life,” he said. “Many people can and do stop. Others maintain a low, voluntary rate of smoking all through their lives.”

Kleinman said though some theories state that the unpleasantness of withdrawal effects may keep smokers from quitting, no study has determined conclusively that there are even mild withdrawal effects in all smokers.

“In any case, the withdrawal effects of smoking are nowhere near as difficult as with morphine or heroin,” Kleinman said.

Since not all persons smoke and those who do smoke to varying degrees, nicotine must have different rewards for different persons, he said.

Kleinman is investigating the psychological and physiological effects of smoking. He said the common belief that nicotine is always a stimulant to the central nervous system may not be correct.

“Many people tend to smoke when they’re nervous, overexcited or anxious. Presumably smoking helps reduce the intensity of these feelings. Why would smokers use a stimulant for its apparently sedative effects?”

Kleinman said nicotine given to rats during the day when they normally sleep did increase activity, but nicotine given to rats at night, when they are usually active, decreased their activity.

These data and others indicate to Kleinman that smoking may have a bi-directional effect—at low levels of arousal it may act as a stimulant and at high levels of arousal it may act as a depressant, depending upon the effects of nicotine on each individual smoker.

Kleinman has conducted a preliminary study of smokers who were asked not to smoke for 12 hours before a series of physiological tests including heart rate and galvanic skin response. He said measurements were recorded when the smokers first reported and continued while each volunteer relaxed for 15 minutes, then smoked his own brand of cigarette at his own rate. He said the results showed generally that volunteers with high arousal levels decreased these levels, while those with low arousal levels increased their levels by smoking.

Kleinman conducted another experiment involving non-smokers, smokers deprived for 24 hours and smokers not deprived at all. They were given performance tasks, one relatively simple and one more difficult.

“Deprived smokers performed better on the easier task and worse on the more difficult task than either of the two other groups,” Kleinman said. “We concluded that smoking deprivation produced definite signs of withdrawal effects, taking the form of an increase in arousal facilitating performance on the easier task and retarded performance on the one that was more difficult.”

Kleinman said more research needs to be done.

“There’s remarkably little sound experimental evidence on why people smoke and what happens to them when they stop,” he said.

Though some methods produce short-term results, Kleinman said follow-up studies indicate that as many as 90 per cent of “quitters” return to smoking within six months.

“The biggest problem is that rewards are long-term; for example, smokers are told if they stop they may not develop lung cancer in 30 years,” Kleinman said. “But there are short-term effects that are negative. If we’re going to get people to stop, we must understand more fully why they smoke in the first place.”

For Members ONLY—

SIU Press books at 20% off the published price!

It's only one way you'll benefit from belonging to the SIU Alumni Association.

In an effort to be of greater service to its members, the Alumni Association is offering SIU Press books at a big savings. A wide variety of subjects was selected for a broad appeal to the alumni body. We hope you will find one or more publications of interest to you or a friend. Many of the volumes would make thoughtful and cherished Christmas gifts.

As an extra bonus, if you order \$10 or more worth of books, we will send you *Siege and Survival, The Odyssey of a Leningrader* by Elena Skrbjabinina for only \$1.00 plus \$.05 tax—the regular price is \$4.95. So act now, and get your order in.

A Secret War: Americans in China, 1944–1945

By Oliver J. Caldwell

This inside story of American undercover activities in China during World War II provides unique insights into the operations of Chiang Kai-shek's secret service. Caldwell tells his story not only for historians and government leaders, but because he feels that the "American people should know how disastrous U.S. policy in East Asia has been during this century." The secret war described in the book is the clandestine and sometimes brutal struggle between the OSS and the dreaded secret police headed by the sinister General Tai Li and the efforts of a "third force"—the Triad of Chinese secret societies—which enlisted Caldwell's efforts to secure American help in ousting Chiang.

The First Freedom

By Bryce Rucker

This book is a substantially documented account of the dangers threatening all mass media through monopoly, chain and cross-media ownership trends. The book focuses particularly on the appalling lack of diversity of voices in the marketplace of ideas. Rucker provides a brief historical base for each medium and service discussed. He examines chain and monopoly control of the print and broadcast media, the monopoly influence exerted by news services and feature syndicates, the problems that plague broadcasting: the rating services, payola and plugola, the sorry conditions of UHF television and FM radio, the stranglehold over TV maintained by the networks, domination by advertising, community antenna television (CATV), subscription television (STV) and noncommercial

television. This is a highly valuable book, not only for those interested in the various media, but for every thinking, listening, watching person.

The Origins of Civilization

By Carroll Riley

For the beginning student and general reader, this brief, concise account of the great movements in time of culture and civilizations will be especially valuable. Coverage of the Old World and the New in the book is well balanced, and includes much new material. Special chapters are devoted to the more important areas, such as Egypt, Mesopotamia, the Indus, the Levant, Crete, The Greeks, the Western Mediterranean, China, Mesoamerica and the Cen-

tral Andes. Illustrated with photographs, drawings, charts and maps.

New Earth

By Jack Chen
Illustrated by the Author

Until now, very little firsthand information about Communist China has been available in this country. Of extraordinary importance, therefore, is the story of an early collective farm in East China's Chekiang Province in the 1949-56 period. The county chronicled in this book is Hsinteng County, one of China's 2,082 counties. It offers a typical example of the cooperative movement that swept the Chinese countryside and formed the basis of the Green Revolution, a part of the overall policy drafted by Mao Tse-tung. This volume, now published for the first time in America, will provide the general reader, the student and the China specialist with valuable background information which will broaden the understanding of today's China.

Land Between the Rivers

By C. William Horrell, Henry Dan Piper, John Voigt

Lying in an area bordered by the Wabash, Ohio and Mississippi rivers, the Southern Illinois country is rich in history, folklore, scenery and natural resources. At about the latitude of southern Virginia, and extending from the prairie farmland of central Illinois to the rugged "Illinois Ozarks," called locally the Shawnee Hills, the area is the natural terminal boundary for hundreds of plant species reaching out to all

points of the compass. It is also the oldest and more sparsely populated part of Illinois, a region of small towns and independent people, typical of the vast mid-American region of which it is a part—the heartland of the U.S.A.—but with unique qualities, features and attitudes which the authors movingly describe in words and pictures. In black and white, as well as color photographs, and in text, the book portrays the region's physical features, its history, its people, life and customs. An uncommon portrayal of American life in a distinctive region, the book provides a memorable journey both in time and place.

Think Back on Us. . .The Social Record

By Malcolm Cowley
Edited by Henry Dan Piper

This volume illuminates the issues, problems and ideas of the 1930's. Several general essays are included which discuss the familiar themes of the Thirties—communism in its various forms, the pacifist crusade, the crusade against world facism and the collapse of the American economy.

"A rare and exciting collection which makes me want to re-read at least a score of the books from that time"

—William Hogan
San Francisco Chronicle

Think Back on Us. . .The Literary Record

By Malcolm Cowley
Edited by Henry Dan Piper

"The book serves the purpose for which Professor Piper edited it—to give young people some idea of what

the Thirties were like. . .One thing undergraduates are bound to learn. . .is that the decade is not to be summed up in a single generalization."

—Granville Hicks
Saturday Review

This book covers the literary world in a detailed, week-by-week fashion, roughly from the stock market crash in 1929 to the Pearl Harbor attack in 1941.

Two Planets

By Kurd Lasswitz
Translated by Hans Rudnick

This fascinating tale of today, yesterday and tomorrow has for decades captured the imagination of Europeans. The utopian vision and technological fantasy of *Two Planets* has undoubtedly influenced German astronautical thought as well as the fancies of countless readers who have turned from its pages to gaze at the stars and dream of other worlds. In 1897, Kurd Lasswitz, mathematics teacher and philosopher, published a novel about man's first encounter with beings from another planet. Lasswitz's Martians differ little from man physically, but ethically intellectually, scientifically and socially, they are the prototype of the ideal human being. The story revolves around a group of German scientists who, when seeking the North Pole, come upon a Martian settlement there. The Martians have built an artificial island, adapted to their needs, above which hovers their space station, a giant ring such as twentieth-century astronautical scientists have seriously speculated upon. The action of the story is seen

Now, Alumni Association members can buy Southern Illinois University Press books at a 20% savings!

through the eyes of several characters, both Martian and human, and is drawn together by the love affair between a beautiful Martian girl and a member of the exploring party.

Legends and Lore of Southern Illinois

By John W. Allen

Against the cultural and historical backdrop of southern Illinois, Allen has written sketches of the people of the region—of their folkways and beliefs, their endeavors, successes, failures and tragedies, and of the land to which they came. It is a land rich in Indian lore and legend, and many reminders of the primitive life remain. There are accounts here of some early homes, taverns, churches, and public buildings. There are stories here of life on the farm, and of slaves and their masters. Today southern Illinois is on the verge of a cultural and industrial renaissance. The area is rich in natural resources. It has become a nationally known recreation center; it supports a distinguished university. In a few years many of the vestiges of its past culture will have disappeared and will survive only in museum and in the written record. These sketches of John Allen's will be a part of that record.

It Happened in Southern Illinois

By John W. Allen

Included in this book are sketches of the early pioneering days, when wolves were literally chased from the

door, stories about the many Indian artifacts discovered among the rolling hills and valleys of the area and articles pertaining to the historic strategic role this region played during the Civil War. Here are glimpses into the past activities of such infamous outlaws as Samuel Mason and the Harpe brothers—who found the area's caves and rivers an attractive location for outlawry—as well as the famous Illinois-born heroes, "Bat" Masterson, "Wild Bill" Hickok and Wyatt Earp. This book can well serve as a reference guide for touring some of the landmarks of historical interest and natural beauty found in abundance in southern Illinois.

The Illinois Fact Book and Historical Almanac, 1673–1968

By John Clayton

In 1818, when Illinois was admitted to the Union as the twenty-first state, it had three incorporated municipalities and a population of less than 50,000. In its sesquicentennial year in 1968, the prairie state had 1,258 municipalities and over 10,000,000 residents. Why did Illinois grow so rapidly and assume such an important role in the nation's economy? What contributions has the state made to the arts, to the conservation of natural resources, to science, to social work, to recreation and who were the people who helped in the development of Illinois. This book, thoroughly indexed, is the first publication to bring the statistical facts, general information and history together in one book, concisely and

authoritatively.

Siege and Survival The Odyssey of a Leningrader

By Elena Skryabina
From the Foreword

"When the 900-day siege of Leningrad was finally lifted and the gaunt, brave survivors had basked a bit in the fitful spring sunshine, the Soviet government made one of its rare graceful gestures to these heroic people. It awarded to the survivors the Medal for Defense of Leningrad. Those who had chanced to come through alive got the medal. In all, more than 300,000 medals were passed out—it may sound like a very large total. But when you consider the fact that something like 3,300,000 persons were trapped within the siege lines when the long blockade began on September 8, 1941, the number is not so large. Of course, between 1,100,000 and 1,500,000 persons died during the siege—of hunger, of cold, of disease, of German bullets, bombs and shells.

"A valuable supplement to books that provide a broader view of Soviet life under Stalin" —*Saturday Review*

SIU Alumni Club Forms in Nepal

Alumni of SIU at Carbondale are now working on forming an SIU Club in Nepal, half way around the world from their alma mater.

A formation committee, headed by Kedar Nath Shrestha, Ph.D. '71, the undersecretary of higher education in Nepal, has been set up recently in Kathmandu. It will be open to Nepalese who have attended SIU as students, Nepalese professors who have participated in the exchange program between Tribhuvan University and SIU and Nepalese persons who have worked with members of the SIU contract team. SIU, under contract with the U.S. Agency for International Development since 1966, has helped train teachers in Nepal's vocational schools.

Workshop Brings Together Alumni, Administrators

Representatives of 20 SIU alumni clubs were among those attending the Alumni Association's Sixteenth Annual Fall Club Officers' Workshop, held this year in the Student Center at Carbondale.

Ten members of the Association board of directors also were included among the 85 people attending.

The workshop opened with a noon luncheon at which basketball coach Paul Lambert and Saluki Athletic Club president Don Ward '58, M.S. '65, were guest speakers.

Lambert encouraged alumni to help recruit potential SIU basketball players and said that SIU would probably move toward a conference affiliation when a new athletic director is named. (See Deadline Sports.)

Ward invited alumni to join the Saluki Athletic Club and stressed that the organization's goals were 1) promoting attendance at athletic events, 2) recognition of the SIU colors and 3) recognition of all athletes in all sports.

Ted Taylor '44, Alumni Association president, moderated the afternoon session which featured David Derge, SIU at Carbondale president and Richard Mager, Vice President for Development and Services.

Derge emphasized the need for Southern to now grow in excellence, not quantity. He mentioned three new buildings planned for the Carbondale campus—the Center for the Advanced Studies in Physical Science, a Vocational Technical Institute building on campus and a new security police building.

Commenting on the University House, Derge said it is now owned by the SIU Foundation. The house was not paid for by tax money, but through a gift from philanthropist W. Clement Stone.

Vice President Mager talked of an information service to be located in the Chicago area. The purposes of

such a center would be to recruit students, provide information about SIU to interested persons, serve as a channel to SIU for alumni and parents and function as a headquarters

Home Ec Becomes Constituent Society

The second constituent society on the Carbondale campus of Southern Illinois University has organized and received recognition from the Alumni Association Board of Directors. It is the Home Economics Constituent Society.

Officers elected to head the society are: Kathy Sohn Keim '57, M.S. '65, president; Oleta Barrow '60, M.S. '63, vice president; Edna Jacqueline Eddleman '58, M.S. '61, Ph.D. '70, vice president; Marolyn Womack O'Neil '59, secretary; and Phyllis Bubnas '57, M.S. '60, treasurer.

All former students and graduates of the School of Home Economics

for meetings. He also talked of the possibility of a fund-raising feasibility study for SIU.

After Mager's remarks, Alumni Association Executive Director Bob Odaniell reported on the progress of the Association and the new Constituent Society program.

Following the workshop, club leaders attended a reception hosted by President and Mrs. Derge in the University House which alumni were invited to tour.

Climax of the workshop was the Saluki-Dayton football game in McAndrew Stadium—a 6-6 tie.

are automatically associated with the new constituent society. Only members of the SIU Alumni Association, however, may be voting and office-holding members of the society.

The purpose of constituent societies is to form alumni groups by college, school or division, thereby bringing graduates and ex-students with similar vocational interest together.

On hand for the official presentation of the Business Constituent Society charter at Carbondale were from left, Larry Jacober '62, M.S. '65, president-elect of the SIU Alumni Association; David R. Derge, president of SIU at Carbondale; Charles Hindersman, dean of the School of Business; and B. D. Cross '53, M.S. '65, president of the new constituent society. The business group was the first society to form on the Carbondale campus under the constituency plan.

We've got just what you need for your next card party—SIU playing cards! These handsome cards feature the finest patented Redi Slip plasticized finish which resists wear and can be wiped clean with a damp cloth. One deck backed in white and gold, the other in maroon, white and gold—both with the SIU seal in gold. With an extra joker for canasta in each deck, they're packed in a twin-tuck gold carton and mailing case. The perfect gift and only \$3.00 a set. Obtain yours from the Alumni Office, Southern Illinois University, Carbondale, Ill. 62901. Illinois residents add 5% sales tax. Make checks payable to the SIU Alumni Association.

Two Alumni Associations Formed

The Legislative Council of the SIU Alumni Association has authorized the formation of two separate alumni associations—one for SIU at Carbondale and one for SIU at Edwardsville. The action is effective Jan. 1, 1973.

The Council had voted at its annual meeting in June to set in motion the plans for separating the Association. Members met in special session at Carbondale, Oct. 28, during Homecoming weekend and voted unanimously to create two separate

and autonomous organizations. The Council voted to amend the by-laws to apply only to the Carbondale campus and approved the procedure for separation of funds to be transferred to Edwardsville. After Jan. 1, those funds will be transferred following the establishment of a chartered not-for-profit corporation to receive them at Edwardsville.

Presently executive director of the SIU Alumni Association, Bob Odaniell will continue as director of Alumni Services at Carbondale and executive director of the SIU Alumni Association at Carbondale in January. Warren Stookey, who is now director of Alumni Services at Edwardsville, will assume the Association directorship at Edwardsville.

With the split of the Association, alumni with one or more degrees from the same campus will be eligible for membership in the Association affiliated with the University they attended. Graduates and ex students of both universities will be eligible to belong to either or both of the associations.

E'ville to Receive Separate Magazine

Due to the decentralization of the SIU Alumni Association, this is the last issue of *Alumnus* magazine that graduates and former students from the Edwardsville campus will receive. Starting in January, a new quarterly magazine will be mailed to all members of the SIU at Edwardsville Alumni Association. Alumni members from Carbondale will continue to receive *Alumnus*.

Col. Chu Chen-hua M.A. '67 of the Republic of China met another SIU alumnus Peter Seow ex '66 on a recent trip to Singapore. Chu, who is president of the SIU Alumni Club in Taiwan, offered a two-week radio-television and speech communications workshop on the island. Seow is the head of the educational television station in Singapore.

Nominations Open

Nominations are now open for 1973 Alumni Achievement Award recipients, to be honored on Alumni Day next June. Deadline for nominations is Feb. 15.

All SIU graduates and former students are eligible for Achievement Awards except present faculty members, members of the Board of Trustees and the current Alumni Association president.

Awards are given both for outstanding professional achievement and for service to the University, the Alumni Association or both.

Any Association member may make nominations. Names of nominees and brief supporting material should be sent to the Alumni Office at Carbondale or Edwardsville.

Obelisk Available

Copies of the *Obelisk*, SIU at Carbondale yearbook, are now available to alumni who wish to purchase them.

Cost of the '72 book is \$3.75. The '71 and '70 editions may be purchased for \$1.75 each. Some copies of the Centennial Supplement to the '69 *Obelisk* are also available at \$2.25. All prices include mailing costs.

Send requests to the Obelisk Office, Southern Illinois University, Carbondale, Ill. 62901 and make checks payable to Obelisk.

DEADLINE SPORTS

"I'M GETTING MORE SLEEP," Dr. Donald N. Boydston jokingly responds to the question of how he's getting along since resigning as director of athletics at SIU at Carbondale.

Boydston, who during the past 15 years has guided SIU to national athletic prominence, stepped aside to devote full time as chairman of SIU's health education department.

"Being a part of a fine program for that many years is such an experience that I can't help but feel a loss," Boydston says, more seriously. "My tenure in SIU athletics was a very worthwhile experience and a part of my life I'll never be able to forget."

Boydston is not totally out of Saluki athletics, however. In addition to his duties in health education, he presently is serving on a five-man selection committee to screen applicants for his AD post. In addition he serves as chairman of an SIU committee planning the renovation of McAndrew Stadium.

"My fifteen years as athletic director were exciting and interesting," Boydston continues. "I hope my successor will be as fortunate as I was."

BILL BROWN '41 has been performing yeoman-like duties since taking over as acting director of athletics. He has served as an assistant to Boydston for 15 years but was given additional responsibility when Boydston stepped down from the athletic director's post Oct. 2.

"I really have two jobs going at once," said Brown. "Whereas I used to be out on the road visiting schools and people, I'm now tied up a lot in the office with paper work."

Brown emphasized that he plans to keep the same policies in effect as those instituted by Boydston.

"I don't plan any major changes at

BROWN

BOYDSTON

all," he said. "I'm just trying to keep the old boat from rocking."

Brown said he is not interested in becoming the full-time athletic director.

"I took myself out of the picture real fast," he said. "I like what I've been doing and feel the position requires someone much younger than myself."

"OUR DUAL RECORD may not be too outstanding since we probably won't be in good running shape before mid-season. However, we should be pretty tough by the time of the championship meets--Illinois Intercollegiates, Central Collegiates and the NCAA." (Lew Hartzog, Aug. 22, 1972).

"We had a great dual season, now I just hope we can do okay in the championship meets." (Lew Hartzog, Oct. 23, 1972).

Hartzog admits he's hedging a little now that his Saluki cross country team has just blistered through its first undefeated dual season since 1960.

"We could do well in all three of the championship meets if our kids continue to perform as they did at the Air Force meet."

The Salukis raced past the Falcons, 20 to 35, at Colorado Springs, Colo. despite the high altitude obstacle.

It was the seventh victory without a setback for SIU's harriers in 1972. Only a fourth-place finish at the Notre Dame Invitational two weeks ago marred the Salukis' record.

"We have four young men--Gerry Craig, John St. John, David Hill and Dan Bulloch--who are running well enough right now to be representative in any meet."

Hartzog is particularly excited about Hill's recent progress. Slowed earlier by injuries, the junior from Trois Rivieres (Quebec) Can., finished right behind Craig at Colorado Springs.

"He's getting back into old David Hill form," Hartzog says.

SEVERAL NEW FACES will dot Southern Illinois University at Carbondale's basketball picture this season.

Only five members of coach Paul Lambert's 15-man squad played for the Salukis last season. They are lettermen: seniors Nate Hawthorne, John Marker, Mike Molnar,

Don Portugal and junior Eddie James.

The rest of SIU's inexperienced troupe is made up of five sophomores and five junior college transfers.

"Most of the players are familiar with their individual roles in our system," Lambert said, "but their teammates are strangers, and we're a long way from functioning as a smooth unit."

Up from last year's SIU freshman team are Joe Meriweather, a 6-11 center, 6-2 guard Rickey Boynton, 6-5 forward A.J. Willis and 6-6 forward Felton Chinn.

Also being counted on to take up some of the slack caused by the graduation of seven lettermen are five junior college transfers, 6-7 George Thompson and 6-9 Jim Blamy, both of Leicester (Mass.) J.C., 6-6 Alvin Hendricks from Paducah (Ky.) J.C., 6-0 Dennis Shilder from Vincennes (Ind.) J.C. and 6-3 Bob Clarke from Canton (N.J.) J.C.

"It will be a matter of maturing and adjusting for some of these younger players," Lambert said, "but as far as physical ability, size, speed and quickness, we're already ahead of last year."

"Generally, these physical abilities will allow us to be a more competitive ballclub. As a team, our individual players should compliment each other's abilities better." Lambert also expects more scoring and better rebounding from inside with the likes of Meriweather, Thompson, Blamy and Hendricks.

SOUTHERN ILLINOIS UNIVERSITY at Edwardsville's soccer team was ranked No. 1 in the Midwest by the Intercollegiate Football Soccer Coaches Association of America the last week in October following the Cougar kickers' two victories over the University of Missouri, St. Louis, 2-0, and Michigan State University, 4-1.

BOB GUELKER, athletic director and soccer coach at Edwardsville, was named chairman of the selection committee to choose four teams to play in the college division of the National Collegiate Athletic Association's post-season soccer tournament. SIU at Edwardsville has been picked to host the finals of the tournament on Dec. 7 and 9.

here, there...

1904 ROBERT W. TEETER, 2, has moved to Wesley Willows, a Methodist retirement home in Rockford. After spending five years as Morton High School's physical director, he became the executive vice-president of the Berwyn State Bank and president of the Lyons State Bank until 1931. At this time he devoted his interests to his own insurance brokerage and mortgage investment business when in 1941, he became the assistant state supervisor of the Division of Vocational Rehabilitation with the State of Illinois. Teeter retired from this position in 1960.

1919 Mrs. John T. Clark (BLANCHE L. HAYES, 2, '25) has retired after teaching 35 years in Illinois, Missouri, North Carolina and California including positions in junior high, senior high and teacher's college. She makes Los Angeles, Calif., her home.

MRS. CLARK

1924 GERTRUDE BRINKMAN, 2, '40, lives in Belleville where she is retired from teaching.

1930 Mrs. John A. Mottar (EMMA LOUISE PARKINSON, 2, '39, M.S. '70) lives in Edwardsville where she is a sixth grade teacher with the Edwardsville District #7.

1932 Mrs. Willard Smith (BERNICE

SICKMAN, 2, '44, M.S. '49) has retired after 38 years of service in Illinois educational systems. Her last 24 years of service were spent in Decatur where she makes her home.

1933 ALICE K. SWAGLER, 2, '67, teaches second grade in the Carlyle Elementary School. She resides in Shattuc.

1935 The Rev. ALLEN W. GRAVES has been named vice-president for student affairs with The Southern Baptist Theological Seminary in Louisville, Ky. Previously a pastor at several Baptist churches in Florida, Virginia and Oklahoma, Graves served as Dean of the School of Religious Education at the Southern Baptist Theological Seminary from 1956 until he became administrative dean of that school in 1969.

1940 DONALD L. BRYANT has been elected senior vice-president of corporate relations with The Equitable Life Assurance Society of the U.S. Bryant, who began his life insurance career as an Equitable agent in Carbondale in 1946, has been president of the SIU Foundation, as well as president of the SIU Alumni Association. He also has received SIU's Alumni Achievement Award. Bryant and his wife, the former EILEEN ARIETTA GALLOWAY, ex '41, have four children and reside in New York City, N.Y.

BRYANT

VIRGIL A. HOLLIS has been named vice-president of financial operations with the Sherwin-Williams Company in Cleveland, Oh. He also is supervising director with Verffabrieken Ralston, N.V., a Sherwin-Williams subsidiary in the Netherlands. Hollis and his wife, the former ELIZABETH ZIMMER '36-2, '38, reside in Lakewood, Oh.

HOLLIS

1942 C. ROY RYLANDER, varsity tennis coach and head trainer at the University of Delaware, has been included in two biographical publications—the Dictionary of International Biography and the Community Leaders of America. He holds his master's and doctor's degree from New York University.

1944 LOIS HICKOK NELSON has retired after serving 24 years with SIU at Carbondale, including 22 years as secretary to the SIU president. She holds a master's degree from the University of Illinois.

1952 ELAINE DICKSON, who has held management positions with the Woman's Missionary Union in Birmingham, Ala., was recently appointed Dean of Student Affairs with the Southern Baptist Theological Seminary in Louisville, Ky. She received her master of religious education degree from Southwestern Baptist Theological Seminary in Fort Worth, Tex.

CHARLES W. RYAN has been appointed secretary in the life, accident and group/railroad and medicare division of the claim department at The Travelers Insurance Companies in Hartford, Conn. He, his wife, and their three children reside in Manchester, Conn.

RYAN

1953 CARROLL D. COX is vice-president of the employee benefits department with Fred S. James & Co.—Insurance Brokers & Consultants. He and his wife, Joyce, reside in Lake Oswego, Ore.

1954 GENE D. ALLSUP, M.S. '56, Ph.D. '66, is an assistant professor at SIU Edwardsville. He and his wife, JANE HESTER ALLSUP '67, M.S. '70, have five children and reside in Florissant, Mo.

Mr. and Mrs. LESTER J. DAVIS (PEGGY ANN DAVIS, ex '57) and their two sons, Kurt and Eric, live in Hurst, Tex. Davis is a pilot with American Airlines.

1955 JERRY H. COLE, Chicago regional sales manager of the *Progressive Grocer*, a trade magazine for supermarket managers and management, has been honored as "salesman of the year" for his outstanding sales and creative accomplishments. In his job, Cole is responsible for the state of Ohio, northern Indiana and Chicago area.

Dr. JOHN O. HUDGINS, JR., a Murphysboro dentist, went to Guatemala in June where he was a member of a health team for three weeks.

JAMES F. MICK, Cert. Spec. '66, is a counselor in the senior high school with the Jersey County Schools in Jerseyville. He and his wife, Ione, make their home

in Alton.

DAVID W. SHAW has been promoted to southern district manager with the Fine Paper Sales Union Camp Corporation in Franklin, Va. He and his wife, Mary, reside in Suffolk, Va.

JERRY GORDON WEST has graduated from the U.S. Air Force's senior professional military

WEST

school, the Air War College, at Maxwell AFB, Ala. He is now assigned as a reconnaissance pilot at Kadena AB, Okinawa with a unit of the Pacific Air Forces, Headquarters for air operations in Southeast Asia, the Far East and the Pacific area. West's awards and decorations include the Distinguished Flying Cross, the Bronze Star Medal, nine Air Medals and two Air Force Commendation Medals. His wife is the former SHIRLEY JEAN HAUG '53.

1956 DAN M. MOORE, M.S. '62, lives in Des Plaines. He is a Spanish teacher in the Prospect High School.

DONALD E. PHILLIPS has been named director of membership publications with the Illinois Agriculture Association. In addition to his new assignment, Phillips will continue in the role as editor of the *IAA Record*. Past president of the SIU Journalism Alumni Association,

Phillips served with the *Marion Daily Republican* before joining the IAA in 1960. His wife is the former PEGGY ANNE MORGAN, ex.

Mr. and Mrs. JAMES L. WOOTTON and their five children live in Taejeon, Korea. Wootton is the principal of the Korea Christian Academy.

1957 Mr. and Mrs. HENRY E. KROEGER, VTI, (CAROL S. NORRIS KROEGER '71), and their daughter, Susan, live in Anna. Mrs. Kroeger is an English teacher in the Anna-Jonesboro Community High School.

Mr. and Mrs. ROLAND D. MILES (MARY ANN MILES, ex) and their five children live in Rockford where Miles is vice-president and cashier with the City National Bank.

1958 LEE ROY BRANDON has been named executive director of the Illinois Industrial Development Authority, a state agency which provides low interest loans to new and expanding businesses. Brandon, who has been manager of the Herrin Chamber of Commerce since 1967, is president of the Herrin United Fund, a member of the Unit Four Board of Education and a member of the President's Advisory Committee for John A. Logan College. He, his wife, Jeannette, and their three children, Eric, Yvonne and Leanne, make their home in Herrin.

JACK R. DYER, M.S. '62, former

editor with McGraw-Hill, Inc. and assistant head of Central Publications at SIU, has joined the University of Rochester's Office of Public Relations as associate editor. He and his wife have two children and live in Fairport, N.Y.

DYER

THOMAS CLAY OLIVER, M.A. '60, director of the ACT Southeastern Regional Office in Atlanta, Ga., has been promoted to assistant vice-president for Education Services with the American College Testing Program. Before joining ACT, Oliver served eight years as supervisor of testing at SIU. He and his wife, YVONNE OLIVER, ex '61, have three children.

HAROLD A. SCHULZ, M.S., is the chaplain of Eden home, a retirement community for senior citizens. In his new position, Schulz also does counseling and public relations work. He makes his home in New Braunfels, Tex.

JOE LARRY STRECKFUSS, M.A. '61, Ph.D. '68, is an assistant professor at the University of Texas. He, his wife Betty, and their children, John, Allyson and Andrew, make Houston, Tex., their home.

1959 BRIAN L. MERRIMAN has been promoted to sales manager with the

Deaths

1908 CLARENCE F. ANDERSON, 2, died July 30 in the St. Francis Hospital in Peoria. Mr. Anderson had taught vocational agriculture at Mt. Vernon and later was state superintendent of vocational agriculture teachers. Prior to his retirement in 1953, he had spent 41 years as a teacher and supervisor. Surviving is his wife, RUTH I. McCREERY '09.

1916 MADELLE BOYD TRIPET, 2, died July 22 in MacNeal Memorial Hospital in Berwyn. Prior to her retirement in 1960, Mrs. Tripet had taught for 30 years in the Chicago Public School System. She is survived by a son, a daughter and one sister.

1923 MORRIS E. BITTLE, 2, died July

24 in Doctors Hospital in Carbondale. He was a farmer and a retired school-teacher. Survivors include his wife, GEORGIA CRUSE, ex '30, a brother and a niece.

1926 MAXINE M. HEISLER, 2, '52, died September 5 in the Deaconess Hospital in St. Louis, Mo. Miss Heisler, a member of the Illinois Education Association, was a school teacher in the Pinckneyville Grade School District for 46 years. Survivors include a sister and a brother. One brother preceded her in death.

1927 RUTH NEAL, 2, died in August in a Denver, Colo., hospital following a short illness. Miss Neal, who taught school in Rawlins, Wyo., for 41 years before retiring in 1968, taught in Benton Schools before going to Rawlins. She is survived by her step-mother, five sisters and three brothers. She was preceded in death by her mother and father.

1930 GOLDA JOHNSON, ex, died July 7 in Benton. She was a retired school teacher in the Benton Elementary School System. Survivors include her husband, CHARLES M. JOHNSON '28-2, a son and three grandchildren.

1935 NED FARRIS CARLTON died July 16 in the Memorial Hospital in Chester. He served as superintendent of schools in Randolph County for 24 consecutive years, being elected the first time in 1938. Prior to that, Mr. Carlton had taught in Coulterville and Steeleville and had been principal of the Kaskaskia High School. Survivors include his wife, Rachael, a son, two two step-sons, a daughter and a step-daughter. Two wives preceded him in death.

1947 PAUL MILAN JOYNER, ex, died August 18 in Marion Memorial Hospital after suffering an apparent heart attack. He was the secretary-treasurer of Joyner Brothers Inc. Confectionaires, a wholesale tobacco and candy distributing firm in Marion. Survivors include his wife, NITA Jo WEBB, ex, a daughter and two sons.

1967 GILBERT LeROY HARTLINE died August 22 in the Union County Hospital in Anna of injuries received in a two-car accident. He was assistant director of the adult vocational school in Cairo and was director of the school nursery. Survivors include his wife,

Bette, his mother and a daughter.

1971 MARCO W. STUIVE died June 1 while on his honeymoon in Scottsdale, Ariz. He had been a salesman for Arnold Brothers Ford in Boulder, Colo. Survivors include his wife, Kathy, and his parents.

1972 GERALD LEE LANGSTON died July 2, the victim of an automobile accident. He was employed with the Kresge Corporation as an assistant manager of the Kresge store in Quincy. Survivors include his wife and one child.

The Alumni Office also has been notified of the following deaths:

1950 ADA DAVIS LEUTWILER, ex, Edwardsville, June 20.

1963 MASON ALAN NEWELL, M.S. '64, Aurora, April 23.

FAC REBECCA BAKER died September 6 in Boon County Hospital in Columbia, Mo., while visiting relatives. She was a professor of education at SIU in Carbondale and an authority on early childhood education. She received her Ph.D. degree in 1952 from the University of Iowa and taught in the public schools of Nebraska and Missouri, and later on the college level in Nebraska, Iowa, Wisconsin and Illinois. She also was president of the Illinois Association for Childhood Education from 1965 through 1967 and was appointed regional training officer for Project Headstart for the lower half of Illinois in 1966. Survivors include three brothers and several nieces and nephews.

EX BOARD MEMBER LINDELL W. STURGIS of Metropolis, a member of the SIU Board of Trustees for 30 years, died October 11 of an apparent stroke. He was first named to the board in 1941 when it was the Teacher's College advisory committee for SIU. When the SIU Board of Trustees became independent in 1949, Mr. Sturgis served as a trustee from 1949 until 1951 and from 1953 until 1971. From 1969 to 1971, he served as board chairman. At the time of his death, he was serving as president of the City National Bank in Metropolis, and as a director of the People's National Bank and Trust Co., of Paducah. He also was a director of the Bank of La Center in La Center, Ky. Survivors include his wife, Viola, two daughters, and a sister.

We're Going to Hawaii!

We asked you where you wanted to go on vacation. . .

You told us Hawaii. . .

And that's where we're headed!

There's never been an Hawaiian vacation like this one. You'll have more fun, more service and more downright luxury than any other trip could possibly deliver at any price.

The SIU Alumni Association's fabulous Aloha Carnival 8-day and 7-night vacation is scheduled for March 18-25. And here's what's included in the price:

- 1) round trip flight from St. Louis via American Airlines with food and beverages served aloft
- 2) inflight movies
- 3) complimentary champagne inflight
- 4) traditional flower-lei greeting in Honolulu
- 5) all transfers of you and your baggage between airport and hotel room (tips included)
- 6) pre-registration at hotel
- 7) luxurious accommodations at the Hawaiian Regent (Waikiki's newest and most luxurious beach-front resort—each room has a separate lanai—your choice of restaurants from wine cellar atmosphere to continental dining—swimming pool—cocktail lounges—night clubs—a breathtaking view of the Pacific, Diamond Head and the mountain ranges of Oahu
- 8) champagne breakfasts every morning—(full American breakfast)
- 9) sumptuous dinners nightly (full-course meals every evening in one of the hotel's outstanding restaurants)
- 10) nightly cocktail parties
- 11) sightseeing tour of Honolulu—1/2 day
- 12) optional sightseeing tours available
- 13) Host Escort throughout
- 14) an opportunity to meet and visit with members of the SIU Alumni Club in Hawaii
- 15) your time is your own to spend at your own pace following your own whims

All of this is available for \$399 complete per person double occupancy plus 10% tax and services, much lower than the cost of going without a charter group. You can go for less than the usual fare and better than usual company—SIU alumni! We hope you'll join us. Don't wait too long—there are limited reservations. The trip is limited to members of the SIU Alumni Association at Carbondale and Edwardsville and their immediate families.
